

iPads in Education

We invite you to view some Apple videos that demonstrate the enormous advantage digital textbooks and the iPad will offer to our students. Just click on the link below.

Apple and Education: <http://www.apple.com/education/real-stories/>

The technology goal of Saint Viator High School is to prepare conscientious leaders in the 21st century. The one-to-one iPad program echoes our commitment to deliver a student-centered learning experience that reflects today's world. This partnership with Apple puts us right on the leading edge of technology in the classroom.

In the past few years, we have implemented an action plan, increasing the number of wireless computer labs and using SMART boards and related technologies. In the past year, we have wireless-enabled the whole campus.

All teachers received iPads and have continued to learn how to best implement the use of the iPad to complement the educational program. Faculty are focusing on how to use this innovative tool to simplify and revitalize the learning experience. The iPad will transform the way our teachers teach and our students learn. The use of the iPad in education challenges students to learn by doing and engages them in the learning process in multidimensional, dynamic and creative ways.

Some of the core objectives of this program include:

- replace some textbooks and other printed materials
- replace some calculators for math and science classes
- provide an organized note-taking platform
- provide an online research tool
- provide a platform to facilitate individual and group work
- provide an assessment tool for managing homework, class assignments, quizzes and tests
- provide a student organizer
- provide a platform for video or audio copies of lectures
